EDUCATION

North Carolina Agricultural and Technical State University

Aug 2021-Current

B.S Computer Science December 2026

Relevant Coursework: Intro to Computer Programming, Computer Program Design, Data Structures, Intro to Simulation and Game Design

Technical Skills and Involvement

Technical Skills: Python • C • C# • C++ • CSS • HTML • Java • JavaScript • Linux • RStudio • GitHub • Unity • Visual Studio Code • Eclipse

Involvement: National Society of Black Engineers (NSBE) • Association for Computing Machinery (ACM) • Techtalk Toastmasters • Rotary Club

WORK EXPERIENCE

Cisco Security | Software Engineer Intern | Cryptography IPsec Team

May 2025 - Aug 2025

- Developed a Python-based AI tool leveraging LangChain that analyzes OpenSSL and PQC libraries to generate detailed migration guides, accelerating secure cryptographic transitions and reducing manual effort.

Bunn Piano Tuning, Fuquay Varina, NC | Owner

July 2021 - Present

- Obtained piano tuning certification during Covid shut-in.
- Awarded 73 5-star Google ratings by offering prompt and professional service to over 150 families, schools, and churches.
- Leverages social media platforms and community networks to market business.

Intern Project Software Engineer: Purpose University | Backend Intern

May 2024 - Aug 2024

- Designed and developed a mobile app and website using Ionic and Swift, increasing user engagement by 20%.
- Leveraged Spring Boot backend for efficient data management of the Purpose University application.

Projects

Penny Pinch, Budgeting Website | Backend Software Engineer

November, 2024

- Developed a financial web platform to help college students budget effectively.
- Collaborated with a team of four to design and implement backend functionalities.
- Utilized technologies like **CSS, JavaScript, HTML, GitHub, and Figma** to enhance user experience and platform stability.
- Focused on improving financial literacy through intuitive and user-friendly design.

Small But Mighty, Local Business Finder | Backend Software Engineer

October, 2023

- Built a mobile and web platform connecting communities with local businesses.
- Designed and developed backend systems to support curated listings and user interactions.
- Worked closely with a team of four to address the unique needs of small businesses and consumers.
- Used **CSS, JavaScript, HTML, Python, and GitHub** to create a seamless experience for users.
- Helped streamline the discovery of local businesses by reducing reliance on mainstream retailers.

PROFESSIONAL DEVELOPMENT

NCAT Hackathon: Cisco Small Business Challenge, 2nd Place Winner

October 2023

- Achievement: Secured 2nd place in the NCAT Hackathon: Cisco Small Business Challenge.
- Collaborated with a cross-functional team of four to develop a JavaScript-based application that connects users to local small businesses.
- Skills Demonstrated:
 - Proficiency in presentation skills, effectively conveying project concepts.
 - Teamwork and collaboration, contributing to a successful group effort.
 - Application of marketing principles for user engagement.
 - Problem-solving skills, addressing challenges throughout the project's lifecycle.

NCAT Hackathon: Honeywell Game Design Challenge

March 2023

- Designed a competitive 3D learning game in C# and Unity that helps students practice concepts in various educational subjects.
- Demonstrated leadership and collaboration skills by successfully managing a multidisciplinary team to deliver a polished prototype.
