EDUCATION

North Carolina Agricultural and Technical State University

Greensboro, NC

Bachelor of Science: Computer Science

Dec 2026

Relevant Coursework: Computer Program Design, Data Structures, Data Base Design, Intro to Simulation and Game Design, Analysis of Algorithms, Internet Systems, Operating Systems, Programming Languages, Computer Architecture and Organization

TECHNICAL CAPABILITIES

Technical Skills: Java • C++ • Python • C# • C • CSS • HTML • JavaScript • Linux • GitHub

Involvement: National Society of Black Engineers (NSBE) • ColorStack • TechTalk Toastmasters • Rotary Club

EXPERIENCE

CISCO SECURITY | Software Engineer Intern | Cryptography IPsec Team

- Developed a Python-based AI tool leveraging LangChain that analyzes OpenSSL and Post-Quantum Cryptography libraries to generate automated migration guides, addressing the critical industry transition to quantum-resistant security protocols in preparation for the post-quantum computing era.
- Reduced manual cryptographic migration effort to a mere minute through intelligent analysis of enterprise-level security implementations, directly supporting Fortune 500 clients' transitions to quantum-safe encryption algorithms and IPsec protocol upgrades.

Morrisville, NC

May – Aug 2025

PURPOSE UNIVERSITY | Project Software Engineer Intern

Remote

- Developed a mobile app and website using Ionic and Swift, increasing user engagement by 20%.
- Debugged back-end to optimize page functionality and user experience.

May – Jul 2024

BUNN PIANO TUNING | Owner

North Carolina

- Obtained piano tuning certification during Covid shut-in.
- Awarded 73 5-star Google ratings by offering prompt and professional service to over 150 families, schools, and churches.

Jul 2021 -Pres.

SELECTED PROJECTS

Noah Bunn Portfolio Webpage. Created a dynamic web portfolio featuring TensorFlow.js-powered audio analysis for real-time beat detection and visual synchronization. Implemented cross-page music continuity, responsive design, and advanced CSS animations to deliver an immersive user experience that demonstrates proficiency in modern web technologies and creative problem-solving

Earworm - Proximity-Based Music Discovery App - Developing a mobile application that connects users through shared music preferences using geolocation APIs and streaming service integrations. Features real-time user discovery, automatic profile sharing within an 8-meter radius, and persistent interaction logging with support for major music platforms including Spotify, Apple Music, and SoundCloud.

PROFESSIONAL DEVELOPMENT

NCAT HACKATHON: Cisco Small Business Challenge, 2nd Place Winner

- Achievement: Secured 2nd place in the NCAT Hackathon: Cisco Small Business Challenge.
- Developed a JavaScript-based local business connection application in a collaborative four-person team, applying presentation skills, marketing principles, and problem-solving techniques to create an engaging user experience that bridges customers with small businesses.
